INTERNATIONAL STANDARD

Fully flexible organic light emitting diode (OLED) panels for general lighting - Performance requirements

ICS 29.140.99

ISBN 978-2-8327-1600-7

CONTENTS

FOREWORD 3
1 Scope 5
2 Normative references 5
3 Terms and definitions 5
4 General statement and test conditions 6
4.1 General 6
4.2 General test conditions 6
4.3 Stabilization 6
4.3.1 General requirements for stabilization 6
4.3.2 Current-driven stabilization 6
4.3.3 Voltage-driven stabilization 7
5 Marking 7
5.1 Marking parameters 7
5.2 Information on reliability of electrical connection 7
6 Initial photometric and electrical characteristics 8
6.1 General 8
6.2 Input power 8
6.3 Luminous flux 8
6.4 Luminous efficacy 8
6.5 Chromaticity coordinates 9
6.6 Correlated colour temperature (CCT) 9
6.7 Colour rendering index (CRI) 9
6.8 Average luminance 9
6.8.1 Initial average luminance (flat configuration) 9
6.8.2 Initial average luminance (bent configuration) 10
6.9 Luminance uniformity 10
6.10 Luminous intensity distribution 10
7 Maintained photometric characteristics 11
7.1 General 11
7.2 Luminous flux maintenance 11
7.3 Maintained operating voltage 11
7.4 Maintained chromaticity coordinates 11
8 Reliability 11
8.1 General 11
8.2 High temperature and high humidity operation test 11
8.3 High temperature and high humidity storage test 12
8.4 Mechanical stress testing 12
Annex A (normative) Measuring methods for bent configurations 13
A.1 General 13
A.2 Luminous flux 13
A.2.1 General 13
A.2.2 Goniophotometric measurements 13
A.3 Average luminance – LMD 15

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

Fully flexible organic light emitting diode (OLED) panels for general lighting - Performance requirements

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at https://patents.iec.ch. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 63553 has been prepared by subcommittee SC 34A: Electric light sources, of IEC technical committee 34: Lighting. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
34A/2484/FDIS	34A/2489/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

In this document, the following types are used:

– requirements: roman type,

– *compliance statements: italic type,*

– notes: smaller roman type.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

– reconfirmed,

– withdrawn, or

– revised.

1 Scope

This document specifies performance requirements of fully flexible organic light emitting diode (OLED) tiles and panels whose configurations are twisted, wavy or helical for use on supplies up to 120 V ripple free DC for indoor and similar general lighting purposes and designed for being bent during the manufacturing process of curved luminaires.

The requirements of this document relate only to type testing.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
