**About the IEC**

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

**About IEC publications**

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

**IEC publications search -**

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

**IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)**

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

**IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)**

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

**IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)**

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

**Electropedia - [www.electropedia.org](http://www.electropedia.org)**

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

**Warning! Make sure that you obtained this publication from an authorized distributor.**

## CONTENTS

FOREWORD.....	8
1 Scope.....	10
2 Normative references .....	10
3 Terms, definitions and abbreviated terms .....	10
3.1 Terms and definitions.....	10
3.2 Abbreviated terms.....	11
4 Overview of electrochemical based EES systems .....	12
4.1 General.....	12
4.2 Application functions.....	12
4.3 System structure.....	13
4.4 Functions of subsystems.....	13
4.4.1 General .....	13
4.4.2 Accumulation subsystem .....	13
4.4.3 Power conversion subsystem (PCS) .....	14
4.4.4 Auxiliary subsystem .....	14
4.4.5 Control subsystem.....	14
5 Design cases of electrochemical based EES systems in power generation side.....	15
5.1 Case 1: 30 MW/15 MWh LFP EESS .....	15
5.1.1 General information .....	15
5.1.2 Integration scheme .....	15
5.1.3 Site and layout.....	17
5.1.4 Design of subsystems.....	18
5.2 Case 2: 15 MW/60 MWh FB EESS .....	23
5.2.1 General information .....	23
5.2.2 Integration scheme .....	24
5.2.3 Site and layout.....	25
5.2.4 Design of subsystems.....	26
5.3 Case 3: 50 MW/300 MWh NAS EESS .....	29
5.3.1 General information .....	29
5.3.2 Integration scheme .....	29
5.3.3 Site and layout.....	31
5.3.4 Design of subsystems.....	32
5.4 Case 4: 100 MW/400 MWh FB EESS .....	35
5.4.1 General information .....	35
5.4.2 Integration scheme .....	36
5.4.3 Site and layout.....	38
5.4.4 Design of subsystems.....	38
6 Design cases of electrochemical based EES systems in transmission and distribution side .....	42
6.1 Case 5: 99,8 MW/99,8 MWh LFP/NCM EESS.....	42
6.1.1 General information .....	42
6.1.2 Integration scheme .....	43
6.1.3 Site and layout.....	43
6.1.4 Design of subsystems.....	45
6.2 Case 6: 7,2 MW/8,6 MWh hybrid EESS.....	48
6.2.1 General information .....	48
6.2.2 Integration scheme .....	49

- 6.2.3 Site and layout..... 50
- 6.2.4 Design of subsystems ..... 51
- 6.3 Case 7: 100 MW/200 MWh LFP EESS ..... 53
  - 6.3.1 General information ..... 53
  - 6.3.2 Integration scheme ..... 54
  - 6.3.3 Site and layout..... 54
  - 6.3.4 Design of subsystems ..... 56
- 6.4 Case 8: 70 MW/140 MWh LFP EESS ..... 58
  - 6.4.1 General information ..... 58
  - 6.4.2 Integration scheme ..... 59
  - 6.4.3 Site and layout..... 59
  - 6.4.4 Design of subsystems ..... 60
- 6.5 Case 9: 12 MW/37 MWh NCM EESS ..... 64
  - 6.5.1 General information ..... 64
  - 6.5.2 Integration scheme ..... 65
  - 6.5.3 Site and layout..... 67
  - 6.5.4 Design of subsystems ..... 69
- 7 Design cases of electrochemical based EES systems in customer side ..... 77
  - 7.1 Case 10: 1 MW/1 MWh Li-ion EESS with PV in a performance verified project ..... 77
    - 7.1.1 General information ..... 77
    - 7.1.2 Integration scheme ..... 77
    - 7.1.3 Site and layout..... 78
    - 7.1.4 Design of subsystems ..... 78
  - 7.2 Case 11: 1 MW/3 MWh LC EESS in PV-storage-charging building ..... 82
    - 7.2.1 General information ..... 82
    - 7.2.2 Integration scheme ..... 83
    - 7.2.3 Site and layout..... 83
    - 7.2.4 Design of subsystems ..... 85
  - 7.3 Case 12: 1 MW × 7 h/3 MW × 13,5 s NAS EESS in standby power system..... 88
    - 7.3.1 General information ..... 88
    - 7.3.2 Integration scheme ..... 89
    - 7.3.3 Site and layout..... 90
    - 7.3.4 Design of subsystems ..... 90
- 8 Design considerations for electrochemical based EES systems ..... 92
  - 8.1 Application functions ..... 92
    - 8.1.1 Application functions in typical scenarios ..... 92
    - 8.1.2 Priority of application functions in typical scenarios ..... 92
  - 8.2 Sizing and selection of battery ..... 93
    - 8.2.1 Battery sizing..... 93
    - 8.2.2 Battery selection..... 93
  - 8.3 Integration scheme ..... 95
    - 8.3.1 Primary POC scheme ..... 95
    - 8.3.2 Auxiliary POC scheme ..... 95
  - 8.4 Site and layout..... 96
    - 8.4.1 Site..... 96
    - 8.4.2 Layout ..... 96
  - 8.5 Subsystem scheme ..... 97
    - 8.5.1 Accumulation subsystem ..... 97

8.5.2	Power conversion subsystem.....	97
8.5.3	Auxiliary subsystem .....	101
8.5.4	Protection subsystem .....	102
8.5.5	Communication subsystem .....	103
8.5.6	Management subsystem .....	103
8.6	System safety measures .....	104
8.6.1	Fire detection and suppression .....	104
8.6.2	Lightning protection .....	104
8.6.3	Earthing of accumulation subsystem.....	105
Annex A (informative) Basic information on electrochemical based EESS cases .....		106
Annex B (informative) Primary POC of electrochemical based EESS to the grid.....		107
B.1	General.....	107
B.2	Primary POC of electrochemical based EESS in power generation side .....	107
B.3	Primary POC of electrochemical based EESS in transmission and distribution side .....	107
B.4	Primary POC of electrochemical based EESS in customer side.....	108
Annex C (informative) Typical electrochemical based EESS information model.....		109
C.1	Logical devices (LD) and Logical nodes (LN) for electrochemical based EESS.....	109
C.2	Data objects for electrochemical based EESS.....	109

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

### ELECTRICAL ENERGY STORAGE (EES) SYSTEMS –

#### **Part 3-200: Planning and performance assessment of electrical energy storage systems – Design principles of electrochemical based EES systems**

#### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TR 62933-3-200 has been prepared by IEC technical committee TC 120: Electrical Energy Storage (EES) Systems. It is a Technical Report.

The text of this Technical Report is based on the following documents:

Draft	Report on voting
120/381/DTR	120/399/RVDTR

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Report is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/publications](http://www.iec.ch/publications).

A list of all parts in the IEC 62833 series, published under the general title *Electrical energy storage (EES) systems*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

## **ELECTRICAL ENERGY STORAGE (EES) SYSTEMS –**

### **Part 3-200: Planning and performance assessment of electrical energy storage systems – Design principles of electrochemical based EES systems**

#### **1 Scope**

This part of IEC 62933, which is a Technical Report, presents an overview and design cases of electrochemical based EES systems in power generation side, transmission and distribution side, and customer side. Furthermore, design principles for electrochemical based EES systems such as sizing and selection of subsystem, integration scheme, site and layout, and system safety measures are provided.

#### **2 Normative references**

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 62933-1:2024, *Electrical energy storage (EES) systems – Part 1: Vocabulary*

IEC TS 62933-3-2:2023, *Electrical energy storage (EES) systems – Part 3-2: Planning and performance assessment of electrical energy storage systems – Additional requirements for power intensive and renewable energy sources integration related applications*

IEC TS 62933-3-3, *Electrical energy storage (EES) systems – Part 3-3: Planning and performance assessment of electrical energy storage systems – Additional requirements for energy intensive and backup power applications*
