EXTENDED VERSION

This full version of IEC 60730-2-24:2026 includes the content of the references made to IEC 60730-1:2022

**Automatic electrical controls -
Part 2-24: Particular requirements for displacement electrical controls**

CONTENTS

FOREWORD	9
1 Scope	12
2 Normative references	12
3 Terms and definitions	16
3.1 Definitions relating to ratings, voltages, currents, frequencies, and wattages	17
 3.2 Definitions of types of control according to purpose	19
3.3 Definitions relating to the function of controls	21
 3.4 Definitions relating to disconnection and interruption	25
3.5 Definitions of types of control according to construction	27
3.6 Definitions of type of automatic action of a control	28
3.7 Definitions relating to protection against electric shock and type of insulation	28
 3.8 Definitions relating to component parts of controls	32
3.9 Definitions of types of terminals and terminations of controls	34
3.10 Definitions relating to the connections to controls	36
3.11 Definitions relating to the performance of type 2 actions	37
3.12 Definitions relating to the requirements for creepage distances and clearances	37
3.13 Miscellaneous definitions	38
3.14 Definitions relating to manufacturer and user	40
3.15 Definitions pertaining to thermistors	40
3.16 Definitions relating to the structure of controls using software	40
3.17 Definitions relating to error avoidance in controls using software	40
3.18 Definitions relating to fault/error control techniques for controls using software	40
3.19 Definitions relating to memory tests for controls using software	40
3.20 Definitions of software terminology – General	40
3.21 Definitions relating to classes of control functions	40
3.22 Definitions relating to functional safety	40
3.23 Definitions related to access to data exchange	40
3.24 Definitions related to EMC performance	41
4 General	43
4.1 General structure of the document	43
4.2 General requirements	44
 4.3 General notes on tests	44
5 Required technical information	48
5.1 General requirements	48
5.2 Methods of providing technical information	48
5.3 Class II symbol	55
5.4 Additional requirements for marking	56
5.5 Warning or cautionary markings	58
6 Protection against electric shock	58
6.1 General requirements	58
6.2 Actuating members and actuating means	60
6.3 Capacitors	61
6.4 Covers and uninsulated live or hazardous parts	61

6.5	Battery operated controls provided with a user accessible mains supply input connector	61
7	Provision for protective earthing	61
7.1	Class 0I and Class I controls	61
7.2	Class II and class III controls	62
7.3	Adequacy of earth connections	62
7.4	Corrosion resistance	63
7.5	Other requirements	63
7.6	Protective equipotential bonding	64
8	Terminals and terminations	64
8.1	Terminals and terminations for external copper conductors	64
8.2	Terminals and terminations for internal conductors	69
8.3	Terminals and terminations for integrated conductors	71
9	Constructional requirements	71
9.1	Materials	71
9.2	Protection against electric shock	71
9.3	Actuation and operation	74
9.4	Actions	77
9.5	Openings in enclosures	80
9.6	Mounting of controls	80
9.7	Attachment of cords	81
9.8	Size of cords – non-detachable	82
9.9	Inlet openings	83
9.10	Equipment inlets and socket-outlets	83
9.11	Requirements during mounting, use, maintenance and servicing	84
9.12	Controls using software	86
9.13	Protective controls and components of protective control systems	89
10	Threaded parts and connections	92
10.1	Threaded parts moved during mounting or servicing	92
10.2	Current-carrying connections and connections providing protective earthing continuity	93
11	Creepage distances, clearances and distances through solid insulation	94
11.1	General	94
11.2	Clearances	95
11.3	Creepage distances	99
11.4	Solid insulation	103
12	Components	104
12.1	Transformers	104
12.2	Switch mode power supplies and converters	104
12.3	Capacitors	105
12.4	Fuses	105
12.5	Varistors	105
12.6	Thermistors	105
12.7	Relays	106
12.8	Other components	106
13	Fault assessment on electronic circuits	106
13.1	Fault assessment for inherent safety	106
13.2	Fault assessment to ensure functional safety	112

14	Moisture and dust resistance	112
14.1	Protection against ingress of water and dust	112
14.2	Protection against humid conditions	113
14.3	Touch current test for in-line cord controls and free-standing controls	114
15	Electric strength and insulation resistance	115
15.1	Insulation resistance	115
15.2	Electric strength	115
15.3	Additional tests for in-line cord and free-standing controls	117
16	Heating	118
17	Manufacturing deviation and drift	122
18	Environmental stress	122
18.1	Transportation and storage	122
18.2	Environmental stress of temperature	122
19	Endurance	123
19.1	General requirements	123
19.2	Electrical conditions for the tests	124
19.3	Thermal conditions for the tests	130
19.4	Manual and mechanical conditions for the tests	130
19.5	Dielectric strength requirements	130
19.6	Ageing test	130
19.7	Overvoltage test or overload test in all countries using an overload test of automatic action at accelerated rate	130
19.8	Test of automatic action at accelerated rate	131
19.9	Test of automatic action at slow rate	131
19.10	Overvoltage test or overload test in all countries that use the overload test of manual action at accelerated speed	131
19.11	Test of manual action at slow speed	131
19.12	Test of manual action at high speed which has multiple poles, and where polarity reversal occurs during the action	131
19.13	Test of manual action at accelerated speed	132
19.14	Evaluation of compliance	132
19.15	Test for particular purpose controls	132
20	Mechanical strength	133
20.1	General requirements	133
20.2	Impact resistance	133
20.3	Free-standing controls	133
20.4	In-line cord controls	133
20.5	Pull-cord actuated controls	134
20.6	Foot actuated controls	134
20.7	Actuating member and actuating means	134
20.8	Flexing – test	134
20.9	Cord anchorages – test	134
21	Resistance to heat, fire and tracking	134
21.1	General requirements	134
21.2	Integrated, incorporated and in-line cord controls	134
21.3	Independently mounted, free-standing controls	136
22	Resistance to corrosion	136
22.1	Resistance to rusting	136

23	Electromagnetic compatibility (EMC) requirements – Emission	137
23.1	General requirement	137
23.2	High frequency emission	137
23.3	Low frequency emission	140
24	Normal operation	140
25	Electromagnetic compatibility (EMC) requirements – Immunity	141
25.1	General	141
25.2	EMC test plan and report	141
25.3	Immunity requirements	143
25.4	Performance criteria	146
25.5	Surge immunity test	147
25.6	Electrical fast transient immunity test	147
25.7	Radio-frequency electromagnetic field immunity	148
25.8	Electrostatic discharge	148
25.9	Immunity to power-frequency magnetic fields	148
25.10	Test of the influence of voltage dips and voltage interruption in the power supply network	148
26	Abnormal operation tests	148
26.1	Abnormal temperature test	149
26.2	Overload tests	150
26.3	Battery short-circuit test	151
	Annex A (normative) Indelibility of markings	171
	Annex B (normative) Measurement of creepage distances and clearances in air	173
	Annex C (informative) Nominal voltages of supply systems for different modes of overvoltage control	177
	Annex D (normative) Overvoltage categories	179
	Annex E (informative) Typical usage of controls and related overvoltage categories	180
	Annex F (normative) Pollution degrees	181
	F.1 Pollution	181
	F.2 Degrees of pollution in the micro-environment	181
	Annex G (normative) Resistance to heat, fire and tracking tests	182
	G.1 Glow-wire test	182
	G.2 Proof tracking test	182
	G.3 Ball pressure test	182
	Annex H (normative) Requirements related to functional safety	184
	H.3 Terms and definitions	184
	H.5 Information	195
	H.9 Constructional requirements	197
	H.13 Fault assessment on electronic circuits	213
	H.17 Manufacturing deviation and drift	218
	H.19 Endurance	221
	H.25 Electromagnetic compatibility (EMC) requirements – Immunity	222
	Annex I (normative) Requirements for certain types of DC supplied controls	223
	I.1 Scope	223
	Annex J (normative) Requirements for thermistor elements and controls using thermistors	225
	J.1 Scope	225

Annex K (normative) Circuit for measuring touch current	242
Annex L (normative) Printed circuit board coating performance test	243
Annex M (normative) Printed circuit board protection	245
Annex N (informative) Explanatory notes for surge immunity test	248
N.1 Different source impedances	248
N.2 Application of the tests	248
N.3 Installation classification	249
Annex O (informative) Guidance for applying Clause 11	252
Annex P (normative) Requirements for SELV and PELV	255
P.1 Overview of the requirements for SELV and PELV	255
P.2 Protection against electric shock by SELV system or PELV system	255
P.3 Protective measures for SELV system and PELV system	256
Annex Q (informative) Regional differences relevant for the member countries of Cenelec	258
Annex R (informative) National differences relevant in the United States of America	263
R.2 Normative references	263
Annex S (informative) National differences relevant in Japan	264
S.2 Normative references	264
Annex T (informative) National differences relevant in Canada	265
T.2 Normative references	265
Annex AA (informative) Guide to the application of displacement electrical controls within the scope of this standard	266
AA.1 General	266
AA.2 Operational features	266
AA.3 Installation specification	266
AA.4 Guidance to choose a proper displacement electrical control for a specific application	269

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Automatic electrical controls -
Part 2-24: Particular requirements for displacement electrical controls**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This extended version (EXV) of the official IEC Standard provides the user with the full content of the Standard.

IEC 60730-2-24:2026 EXV includes the content of IEC 60730-2-24:2026 and the references made to IEC 60730-1:2022.

The specific content of IEC 60730-2-24:2026 is displayed on a blue background.

IEC 60730-2-24 has been prepared by IEC technical committee 72: Automatic electrical controls. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
72/1506/CDV	72/1525/RVC

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

This part 2-24 is intended to be used in conjunction with IEC 60730-1. It was established on the basis of the sixth edition of that standard (2022). Consideration may be given to future editions of, or amendments to, IEC 60730-1.

This part 2-24 supplements or modifies the corresponding clauses in IEC 60730-1, so as to convert that publication into the IEC standard: Particular requirements for displacement electrical controls.

Where this part 2-24 states "addition", "modification" or "replacement", the relevant requirement, test specification or explanatory matter in Part 1 should be adapted accordingly.

Where no change is necessary, part 2-24 indicates that the relevant clause or subclause applies.

In the development of a fully international standard, it has been necessary to take into consideration the differing requirements resulting from practical experience in various parts of the world and to recognize the variation in national electrical systems and wiring rules.

In this publication:

- The following print types are used:
 - requirements proper: in roman type;
 - test specifications: *in italic type*;
 - explanatory matter: in smaller roman type.
 - Defined terms: **bold type**.
- Subclauses, notes or items which are additional to those in Part 1 are numbered starting from 101, additional annexes are lettered AA, BB, etc.

A list of all parts of the IEC 60730 series, under the general title *Automatic electrical controls*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

1 Scope

This part of IEC 60730 applies to automatic **displacement electrical controls**

- for use in, on, or in association with appliances for household and similar use;

NOTE 1 Through this document, the word "**control**" means "**displacement electrical control**".

EXAMPLE 1 **Displacement electrical controls** used in electrical pressure cookers with gross volume up to 25 l, with working pressure over 4 kPa and less than 150 kPa.

- that are AC or DC powered **controls** with a rated voltage not exceeding 690 V AC or 600 V DC;
- used in, on, or in association with equipment that use electricity;
- that are mechanically or electrically operated, responsive to change of position of **point of action**.

NOTE 2 Requirements for manual switches not forming part of an automatic **control** are covered in IEC 61058-1-1.

This document applies to

- inherent safety of automatic electro-mechanical **displacement electrical controls**;
- functional safety of automatic electro-mechanical **displacement electrical controls**;
- the operating values, operating times, and operating sequences where such are associated with equipment safety;
- **displacement electrical controls** having temperature sensing element(s), in which cases additional requirements can be considered to be necessary. Requirements for temperature sensing controls are included in IEC 60730-2-9.

This document specifies the requirements for construction, operation and testing of automatic **displacement electrical controls** used in, on, or in association with equipment.

This document does not

- apply to automatic electronic controls;
- take into account the response value of an automatic action of a control, if such a response value is dependent upon the method of mounting the control in the equipment. Where a response value is of significant purpose for the protection of the user, or surroundings, the value defined in the appropriate equipment standard or as determined by the manufacturer applies.

NOTE 3 For more information about guidance to the application of **displacement electrical controls**, see Annex AA.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60664-3:2016, *Insulation coordination for equipment within low-voltage systems – Part 3: Use of coating, potting or moulding for protection against pollution*

IEC 60664-4, *Insulation coordination for equipment within low-voltage systems – Part 4: Consideration of high-frequency voltage stress*

¹ Withdrawn.

² Withdrawn.

IEC 60695-2-10, *Fire hazard testing – Part 2-10: Glowing/hot-wire based test methods – Glow-wire apparatus and common test procedure*

IEC 60695-2-11:2021, *Fire hazard testing – Part 2-11: Glowing/hot-wire based test methods – Glow-wire flammability test method for end-products (GWEPT)*

IEC 60695-10-2, *Fire hazard testing – Part 10-2: Abnormal heat – Ball pressure test method*

IEC 60738 (all parts), *Thermistors – Directly heated positive temperature coefficient*

IEC 60747-5-5, *Semiconductor devices – Part 5-5: Optoelectronic devices – Photocouplers*

IEC 60884-1, *Plugs and socket-outlets for household and similar purposes – Part 1: General requirements*

IEC 60884-2-5:2017, *Plugs and socket-outlets for household and similar purposes – Part 2-5: Particular requirements for adaptors*

IEC 60998-2-2, *Connecting devices for low-voltage circuits for household and similar purposes – Part 2-2: Particular requirements for connecting devices as separate entities with screwless-type clamping units*

IEC 60998-2-3, *Connecting devices for low-voltage circuits for household and similar purposes – Part 2-3: Particular requirements for connecting devices as separate entities with insulation-piercing clamping units*

IEC 60999-1, *Connecting devices – Electrical copper conductors – Safety requirements for screw-type and screwless-type clamping units – Part 1: General requirements and particular requirements for clamping units for conductors from 0,2 mm² up to 35 mm² (included)*

IEC 61000-3-2, *Electromagnetic compatibility (EMC) – Part 3-2: Limits – Limits for harmonic current emissions (equipment input current ≤ 16 A per phase)*

IEC 61000-3-3, *Electromagnetic compatibility (EMC) – Part 3-3: Limits – Limitation of voltage changes, voltage fluctuations and flicker in public low-voltage supply systems, for equipment with rated current ≤ 16 A per phase and not subject to conditional connection*

IEC 61000-3-11, *Electromagnetic compatibility (EMC) – Part 3-11: Limits – Limitation of voltage changes, voltage fluctuations and flicker in public low-voltage supply systems – Equipment with rated current ≤ 75 A and subject to conditional connection*

IEC 61000-3-12, *Electromagnetic compatibility (EMC) – Part 3-12: Limits – Limits for harmonic currents produced by equipment connected to public low-voltage systems with input current > 16 A and ≤ 75 A per phase*

IEC 61000-4-2:2008, *Electromagnetic compatibility (EMC) – Part 4-2: Testing and measurement techniques – Electrostatic discharge immunity test*

IEC 61000-4-3, *Electromagnetic compatibility (EMC) – Part 4-3: Testing and measurement techniques – Radiated, radio-frequency, electromagnetic field immunity test*

IEC 61000-4-4, *Electromagnetic compatibility (EMC) – Part 4-4: Testing and measurement techniques – Electrical fast transient/burst immunity test*

IEC 61000-4-5:2014, *Electromagnetic compatibility (EMC) – Part 4-5: Testing and measurement techniques – Surge immunity test*
IEC 61000-4-5:2014/AMD1:2017

IEC 61000-4-6, *Electromagnetic compatibility (EMC) – Part 4-6: Testing and measurement techniques – Immunity to conducted disturbances, induced by radio-frequency fields*

IEC 61000-4-8, *Electromagnetic compatibility (EMC) – Part 4-8: Testing and measurement techniques – Power frequency magnetic field immunity test*

IEC 61000-4-11, *Electromagnetic compatibility (EMC) – Part 4-11: Testing and measurement techniques – Voltage dips, short interruptions and voltage variations immunity tests for equipment with current up to 16 A per phase*

IEC 61000-4-13:2002, *Electromagnetic compatibility (EMC) – Part 4-13: Testing and measurement techniques – Harmonics and interharmonics including mains signalling at a.c. power port, low frequency immunity tests*

IEC 61000-4-13:2002 /AMD1:2009

IEC 61000-4-13:2002 /AMD2:2015

IEC 61000-4-20, *Electromagnetic compatibility (EMC) – Part 4-20: Testing and measurement techniques – Emission and immunity testing in transverse electromagnetic (TEM) waveguides*

IEC 61000-4-21, *Electromagnetic compatibility (EMC) – Part 4-21: Testing and measurement techniques – Reverberation chamber test methods*

IEC 61000-4-22, *Electromagnetic compatibility (EMC) – Part 4-22: Testing and measurement techniques – Radiated emissions and immunity measurements in fully anechoic rooms (FARs)*

IEC 61000-4-28, *Electromagnetic compatibility (EMC) – Part 4-28: Testing and measurement techniques – Variation of power frequency, immunity test for equipment with input current not exceeding 16A per phase*

IEC 61000-6-1:2016, *Electromagnetic compatibility (EMC) – Part 6-1: Generic standards – Immunity standard for residential, commercial and light-industrial environments*

IEC 61000-6-2:2016, *Electromagnetic compatibility (EMC) – Part 6-2: Generic standards – Immunity standard for industrial environments*

IEC 61000-6-3:2020, *Electromagnetic compatibility (EMC) – Part 6-3: Generic standards – Emission standard for equipment in residential environments*

IEC 61000-6-4:2018, *Electromagnetic compatibility (EMC) – Part 6-4: Generic standards – Emission standard for industrial environments*

IEC 61051-1, *Varistors for use in electronic equipment – Part 1: Generic specification*

IEC 61051-2, *Varistors for use in electronic equipment – Part 2: Sectional specification for surge suppression varistors*

IEC 61051-2-2, *Varistors for use in electronic equipment – Part 2: Blank detail specification for zinc oxide surge suppression varistors. Assessment level E*

IEC 61210, *Connecting devices – Flat quick-connect terminations for electrical copper conductors – Safety requirements*
