

IEC 60404-8-4

Edition 4.1 2026-06

INTERNATIONAL STANDARD

CONSOLIDATED VERSION

**Magnetic materials -
Part 8-4: Specifications for individual materials - Cold-rolled non-oriented
electrical steel strip and sheet delivered in the fully-processed state**

CONTENTS

FOREWORD.....	3
INTRODUCTION.....	5
1 Scope.....	6
2 Normative references	6
3 Terms and definitions	6
4 Classification.....	7
5 Designation	8
6 General requirements	8
6.1 Production process	8
6.2 Form of supply	8
6.3 Delivery condition	9
6.4 Surface condition	9
6.5 Suitability for cutting	9
7 Technical requirements	9
7.1 Magnetic properties	9
7.1.1 General	9
7.1.2 Magnetic polarization.....	9
7.1.3 Specific total loss	13
7.1.4 Anisotropy of loss	13
7.2 Geometrical characteristics and tolerances	13
7.2.1 Thickness	13
7.2.2 Width.....	14
7.2.3 Length	15
7.2.4 Edge wave (wave factor)	15
7.2.5 Residual curvature.....	15
7.2.6 Edge camber	15
7.3 Technological characteristics	16
7.3.1 Density	16
7.3.2 Stacking factor	16
7.3.3 Number of bends	16
7.3.4 Deviation from the shearing line (internal stress)	16
8 Inspection and testing.....	16
8.1 General.....	16
8.2 Selection of samples.....	17
8.3 Preparation of test specimens.....	17
8.3.1 Magnetic properties	17
8.3.2 Geometrical characteristics and tolerances.....	17
8.3.3 Technological characteristics	18
8.4 Test methods	18
8.4.1 General	18
8.4.2 Magnetic properties	18
8.4.3 Geometrical characteristics and tolerances.....	19
8.4.4 Technological characteristics	19
8.5 Retests	20
9 Marking, labelling and packaging.....	20

10	Complaints	20
11	Information to be supplied by the purchaser	20
	Annex A (informative) Non-specified magnetic properties	22
	Annex B (informative) Calculated density of non-oriented electrical steel.....	23
	Annex C (informative) Number of test strips for magnetic property testing	24
	Bibliography.....	25
	Table 1 – Technological properties and magnetic properties (magnetic properties are measured using the Epstein method according to IEC 60404-2).....	10
	Table 2 – Technological properties and magnetic properties for strip and sheet of nominal thickness 0,47 mm for use at 60 Hz only (magnetic properties are measured using the Epstein method according to IEC 60404-2).....	12
	Table 3 – Tolerances on nominal thickness.....	14
	Table 4 – Tolerances on nominal width	14
	Table A.1 – Non-specified magnetic properties	22
	Table C.1 – Number of test strips for magnetic property testing	24

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Magnetic materials -
Part 8-4: Specifications for individual materials - Cold-rolled non-oriented
electrical steel strip and sheet delivered in the fully-processed state**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of a patent, which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

IEC 60404-8-4 edition 4.1 contains the fourth edition (2022-09) [documents 68/700/CDV and 68/713/RVC] and its amendment 1 (2026-06) [documents 68/793/CDV and 68/806/RVC].

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendment 1. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.

IEC 60404-8-4 has been prepared by IEC technical committee 68: Magnetic alloys and steels. It is an International Standard.

This fourth edition cancels and replaces the third edition published in 2013. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) modification of terms and technical requirements concerning geometrical characteristics to be consistent with IEC 60404-9:2018;
- b) insertion of Table 3 – Tolerances on nominal thickness;
- c) change of the length of test specimen for determination of geometrical characteristics from 2 m to 1 m.

The text of this International Standard is based on the following documents:

Draft	Report on voting
68/700/CDV	68/713/RVC

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 60404 series, published under the general title *Magnetic materials*, can be found on the IEC website.

The committee has decided that the contents of this document and its amendment will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

INTRODUCTION

This revision of International Standard IEC 60404-8-4 has been prepared by the experts of the Working Group 1 of the IEC Technical Committee 68: Magnetic alloys and steels.

The third edition of IEC 60404-8-4 was issued in 2013. After that, other IEC 60404 standards were revised and IEC TC 68 decided in 2019 at their meeting in Düsseldorf to revise this document to maintain consistency for user's convenience. The revision is made mainly on technical amendments regarding testing and definitions of geometrical characteristics in accordance with IEC 60404-9. The length of test specimen for determination of geometrical characteristics is changed from 2 m to 1 m. The term of "flatness" is divided into "edge wave (wave factor)" and "residual curvature" and the horizontal method is introduced for verification of residual curvature. This revision also includes corrections in order to improve consistency with other standards of the IEC 60404-8 series.

1 Scope

This part of IEC 60404 defines the grades of cold-rolled non-oriented electrical steel strip and sheet in nominal thicknesses of 0,35 mm, 0,47 mm, 0,50 mm, 0,65 mm and 1,00 mm. In particular, it gives general requirements, magnetic properties, geometric characteristics, tolerances and technological characteristics, as well as inspection procedure. The nominal thickness 0,47 mm applies to the grades for use at 60 Hz only.

This document applies to cold-rolled non-oriented electrical steel strip and sheet supplied in the fully-processed state, i.e. the final annealed condition, in coils or sheets, and intended for the construction of magnetic circuits. This document does not apply to materials supplied in the semi-processed state.

NOTE The cold-rolled non-oriented electrical steel strip and sheet supplied in the semi-processed state is specified in IEC 60404-8-3.

The grades defined in this document correspond to Class C21 of IEC 60404-1.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
