

IEC 60940

Edition 3.0 2026-06

INTERNATIONAL STANDARD

**Application of capacitors, resistors, inductors and complete filter units for
electromagnetic interference suppression - General rules and safety
requirements**

CONTENTS

FOREWORD	3
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
3.1 Voltage terms	6
3.2 Safety terms	6
4 Electromagnetic and radio frequency interference suppression (EMI/RFI).....	7
4.1 General.....	7
4.2 Limits of interference	7
4.3 Classification of suppression components.....	8
4.3.1 Suppression components.....	8
4.3.2 Capacitors	9
4.3.3 Resistors	9
4.3.4 Inductors	9
4.3.5 Filters	10
5 General safety aspects	10
5.1 EMI suppression components as a protective provision.....	10
5.1.1 General considerations	10
5.1.2 Single fault conditions.....	11
5.1.3 Series connection of components	11
5.2 Earth leakage current.....	11
5.3 Hazards related to EMI suppression components caused by failures.....	11
5.4 Information requirements	12
6 Selection of EMI suppression components.....	12
6.1 Choice of ratings for specific applications	12
6.1.1 General aspects	12
6.1.2 Voltages	12
6.1.3 Current	14
6.1.4 Environmental classification.....	14
6.1.5 Insertion loss	15
6.1.6 Capacitors	15
6.1.7 Inductors	16
6.1.8 Complete filter units.....	16
6.2 Rules for capacitors in three phase EMI suppression filters.....	16
7 Rules for determination of clearance and creepage distances.....	17
7.1 General rules	17
7.1.1 Dimensioning of clearances	17
7.1.2 Dimensioning of creepage distances.....	18
7.1.3 Precautions in handling and operation	19
7.2 Rules for cased or conformal coated components with leads.....	19
7.2.1 Measurement principle.....	19
7.2.2 Creepage distance between terminals	20
7.2.3 Clearance between terminals.....	21
7.2.4 Clearance in mounted stage	21
7.2.5 Conductors between terminals.....	23
7.3 Rules for surface mounted components	23

7.3.1	Clearances and creepage distances – Component body	23
7.3.2	Clearances and creepage distances – Components in mounted stage	24
7.3.3	Requirements	24
8	Passive and active flammability	25
9	Use of X and Y capacitors in AC mains up to 400 Hz	25
9.1	Overview.....	25
9.2	Background.....	25
9.3	Guidelines	25
9.3.1	General	25
9.3.2	Capacitors >10 μ F	25
9.3.3	Voltage derating with frequency	26
	Bibliography.....	27
	Figure 1 – Example use of suppression components in an EMI-filter	8
	Figure 2 – EMI capacitors star-connected	17

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Application of capacitors, resistors, inductors and complete filter units for electromagnetic interference suppression -
General rules and safety requirements**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60940 has been prepared by IEC technical committee 40: Capacitors and resistors for electronic equipment. It is an International Standard.

This third edition cancels and replaces the second edition published in 2015. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) new title to change the document from "guidance" into "general rules and safety requirements";
- b) new content added (Clause 5 to Clause 9);
- c) the previous edition is partly contained in Clause 4.

The text of this International Standard is based on the following documents:

Draft	Report on voting
40/ 3300/FDIS	40/ 3314/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

1 Scope

This document establishes general rules and safety requirements on the application of capacitors, resistors, inductors, and complete filter units for electromagnetic interference suppression which will be connected to an AC mains or other supply (DC or AC) with a nominal voltage not exceeding 1 000 V AC having a nominal frequency not exceeding 400 Hz, or 1 500 V DC.

It facilitates drafters of product safety standards and other stakeholders such as designers, manufacturers, service providers, policy makers and regulators to consider safety aspects for the intended use and the reasonably foreseeable misuse of these components in its products and systems and apply risk reduction measures to achieve a tolerable risk level.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60384-14, *Fixed capacitors for use in electronic equipment - Part 14: Sectional specification - Fixed capacitors for electromagnetic interference suppression and connection to the supply mains*
